MAP I	_EGEND	MAP INFORMATION	
Area of Interest (AOI) Area of Interest (AOI)	✓ US Routes ✓ Major Roads	The soil surveys that comprise your AOI were mapped at 1:20,000.	
Soils Soil Rating Polygons <= 76 > 76 and <= 91	Local Roads  Background  Aerial Photography	Warning: Soil Map may not be valid at this scale. Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detaile scale. Please rely on the bar scale on each map sheet for map measurements.	
<ul> <li>&gt; 91 and &lt;= 95</li> <li>&gt; 95 and &lt;= 96</li> <li>Not rated or not available</li> </ul>	3		
Soil Rating Lines <= 76 > 76 and <= 91		Source of Map: Natural Resources Conservation Service Web Soil Survey URL: Coordinate System: Web Mercator (EPSG:3857)	
<ul> <li>&gt; 91 and &lt;= 95</li> <li>&gt; 95 and &lt;= 96</li> <li>Not rated or not available</li> </ul>	3	Maps from the Web Soil Survey are based on the Web Mercat projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as th Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.	
Soil Rating Points		This product is generated from the USDA-NRCS certified data of the version date(s) listed below.	
<ul> <li>&gt; 76 and &lt;= 91</li> <li>&gt; 91 and &lt;= 95</li> </ul>		Soil Survey Area: McLeod County, Minnesota Survey Area Data: Version 16, Sep 12, 2018	
<ul> <li>&gt; 95 and &lt;= 96</li> <li>Not rated or not available</li> </ul>		Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.	
Not rated or not available Water Features		Date(s) aerial images were photographed: Sep 12, 2010—A 2, 2016	
Streams and Canals  Transportation  HI Rails		The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.	
Interstate Highways			

Map unit symbol	Map unit name	Rating	Acres in AOI	Percent of AOI
239	Le Sueur loam, 1 to 3 percent slopes	96	3.6	7.5%
L13A	Klossner muck, 0 to 1 percent slopes	76	3.9	8.0%
L107A	Canisteo-Glencoe complex, 0 to 2 percent slopes	91	15.1	31.1%
L113B	Reedslake-Le Sueur complex, 1 to 6 percent slopes	96	2.7	5.5%
L1207B	Le Sueur-Reedslake- Cordova complex, 0 to 5 percent slopes	95	23.2	47.9%
Totals for Area of Interest			48.6	100.0%

## **Crop Productivity Index**

## Description

Crop productivity index ratings provide a relative ranking of soils based on their potential for intensive crop production. An index can be used to rate the potential yield of one soil against that of another over a period of time. Ratings range from 0 to 100. The higher numbers indicate higher production potential. The rating is not crop specific. Minnesota inquiries must use the 'Map Unit Cropland Productivity Report (MN)' soils report from the Soil Reports tab under 'Vegetative Productivity'.

When the soils are rated, the following assumptions are made: a) adequate management, b) natural weather conditions (no irrigation), c) artificial drainage where required, d) no frequent flooding on the lower lying soils, and e) no land leveling or terracing. Even though predicted average yields will change with time, the productivity indices are expected to remain relatively constant in relation to one another over time.

## **Rating Options**

Aggregation Method: Weighted Average Component Percent Cutoff: None Specified Tie-break Rule: Higher Interpret Nulls as Zero: Yes
