COMPLAINT:

Replace front and rear dampner on tractor. Repairs approved by Ken B.

CAUSE:

CORRECTION:

brought in track machine drained the engine coolant out of it removed lower radiator hose removed dampener bolts and washer re installed the bolt to protect the threads installed the puller tool and removed the front dampener. replaced the key in the shaft put new dampener on used a bolt that was one inch longer then the actual bolt to start to pull the dampener on then replaced with a new bolt and washer torqued to specification in the book reinstalled the lower radiator line and filled with coolant. put the hood in the service position removed the bracket and flywheel cover removed the nine bolts that hold the input shaft to the dampener then removed the 8 bolts that hold the dampener to the fly wheel removed old dampener reinstalled the new one torqued the 8 bolts that hold the dampener to the flywheel and used the special tool to torque the 9 bolts hold the damper to the input shaft and reinstalled the shields

Removed back cover of machine. Unhooked SSU and removed from machine. cleaned outside of controller with compressed air. split wedge box. Removed Eprom Chip. ordered parts. Once parts arrived installed new chip. Installed diagnostic fuse. Could not find SSU controller on CAN network. Unhooked connector. Checked power at f8 fuse. fuse good. power on both sides of fuse. Used service adviser and pulled up wiring diagram of SSU controller checked Pins E2 and E3 which are power and grounds to SSU. Both Circuits good. Checked 924 and 925 CAN communication lines both circuits are also good. Split wedge box again. Checked ALL pins on EPROM chip. all look good. Removed and rotated chip 180 degrees as it could be installed incorrectly. Installed chip. reinstalled wedge box. hooked up SSU. installed diagnostic fuse and checked the CCD NETWORK for the SSU. SSU is now sending and receiving messages properly over network. removed diagnostic fuse. started machine. pulled out of shop. installed flow meter to heat hydraulic oil. Accessed SSU 20 and performed CP1 calibration. Heated hydraulic oil to 140 degrees. Set transmission to 3rd gear and performed SSU CP2 calibration. double checked SSU addresses and verified correct input. parked machine.

TERMS AND CONDITIONS

Terms: Payment is due the 10th of the month following purchase. A Service Charge of 1.5% per month (Annual Percentage of 18%) will be charged on past due balances. Service charges are added to the statement and become part of the principal obligation to Washington Tractor. All exchanges and refunds must be accompanied by the original signed invoice. Special order parts can only be returned if part is returnable to vendor, and Washington Tractor deems that it is in new condition. Special orders will be charged a 20% restocking fee plus freight. No return on electrical parts or parts being returned after 90 days of original sale date. Any parts returns greater than \$50 originally paid for via cash or check will be reimbursed by check from our main office.
