116252	SAC AUCTION GROUP, LLC						
	Segment: 1	F- CHECK ECU ISSUES		1. Customer WO			
	ec290cl s/n 110441						
	PH 11/4/22Drove to job and when I arrived at the machine the batteries had 3volts so I had to find another machine to connect to this machine.. the machine I used was across the yard and I had to pull it out and to this machine I was working on so I could get display to power up.. I connected to machine and check computers they have current software. The engine ecu isn't working and doesn't show in system. I checked fuses. Someone has replaced 5 fuses with 50 amp fuses. I removed plugs to check for burns or bad connections.. started to dig into harness to check it but the place was closing.. I put back to together a told Celina someone will need to return first of the week						
	Made 3 trips to the job To get the parts and engine ECU replaced after diagnose the harness and sensors to make sure the harness wasn't the issue placed a ECU in machine and reprogrammed and machine ran as it should. Parts have been returned Their mechanic had placed 40 amp fuses where 10 amp should be and 12 volt relays where 24 volt should be Replaced what fuses and relays to where it should be
